

The Planet Earth Is Praising the Lord

Junko Tada

When reading some book, I found the word “Schumann Resonance.” According to the book, it is the resonance between the surface of the earth and the ionosphere of the upper atmosphere. This resonance occurs when electromagnetic waves generated by electrical discharges such as lightning fly around, bouncing between the earth and the ionosphere. It has the same frequency as the alpha rhythm of brainwaves in a relaxed state. This resonance has surrounded the earth ever since ancient times.

When I read it, the image of the earth praising Christ came to me. The earth has been damaged by pollution, destruction of nature, missile attacks in wars and even nuclear bombing, but she is still praising the Lord quietly. I feel as if she had her own will never to stop praising Him no matter what may happen.

Lightning is said to be one of the causes of the Schumann Resonance, and it reminds me of the voice of God described as thunder in Psalms. I imagine that the praise of the earth is drawn out by the voice of God, and responds to His voice.

I did not know such praising of the earth for a long time, but I find that I have been embraced by the praise of the earth ever since I was born. Now I believe I can reverberate with the praise of the earth and be one with it in the *heavenly praises*.

Mysterious are the *heavenly praises*, which the Lord God has been showering upon us.

While singing them, I have often experienced that the resounding tunes of praise harmonize with various sounds outside: chirping of birds, the music played at a nearby elementary school to tell children to go home, the sounds of trains and dump trucks, and even the vibration caused by airplanes flying over my house. I believe it is because the resounding tunes of the *heavenly praises* are the origin of all sounds.

That is why the *heavenly praises* can resound with the praise of the earth.

Pondering over the resounding tunes beyond the sky, I receive a message from the earth in my heart: “I have been waiting for you for so

long.” The earth must have been waiting for partners to reverberate with.

When the *heavenly praises* we sing on the earth and the praise of the earth in the sky resound with each other, I believe the praise will certainly fill the earth and the heaven.

Besides, the praise songs we sing are the *heavenly praises* which resound with the heaven. They will spread not only over the earth and the universe but also infinitely to the first heaven, the second heaven and the third heaven . . . I am excited imagining that scene.

Today, the planet earth is praising the Lord as usual. Looking up at the sky, I feel as if I could hear the praise of the earth. Since it produces the same frequency as the alpha rhythm, it must be reverberating quietly and gently. Although I cannot hear its sound with my physical ears, I can feel the resonance in my heart when I close my eyes and set my mind to it.

I have never thought of praising the Lord with the earth before, but I believe now is the time to do it.

The *heavenly praises* made it possible for us to harmonize with the earth. I will sing the *heavenly praises* feeling the resounding tunes of the earth.
